Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-27 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,769,028 to Sass et al. (hereinafter Sass).

Referring to claims 1, 12, 16-17, 24, and 26, Sass teaches a computer program product, apparatus, program code, and a method for collecting user evaluation feedback in a computer system having a display and capable of generating a user interface through which a user may interact with the system (i.e. Figs. 3-4).

Sass teaches

(A) displaying on the graphic user interface an evaluation component (i.e. media player) comprising at least one displayed command option (i.e. col. 8, lines 22-33) and a plurality of evaluation feedback options (i.e. smiley icon and frowny icon; col. 9, lines 15 and 22);

(B) receiving user selection criteria for one of the command option and the evaluation feedback option(s) (col. 9, lines 10-30); and

(C) initiating execution of a command associated with the displayed command option (i.e. col. 9, lines 25-30).

Art Unit: 2173

As another example, see col. 16, lines 24-33, which describes how the selection of radio stations is used as feedback to determine what stations appeal to a user.

Referring to claims 2, 13, 18, 25, and 27, Sass discloses

(D) recording user selection of one of the plurality of evaluation feedback option. See col. 9, lines 15-19.

Referring to claims 3, 14, and 19, Sass discloses (D) further comprises:

(D1) initiating modification of counter value associated with the selected evaluation feedback option. See col. 9, lines 30-39, which describes collecting (counting) the feedback data for several users.

Referring to claims 4, 15, and 20, Sass discloses (D) further comprises:

(D1) initiating modification of a record value (i.e. within the personal profile) associated with the selected evaluation feedback option. See col. 9, lines 16-21.

Referring to claims 5 and 21, Sass discloses (D) further comprises:

(D2) transmitting the modified record value associated with the selected evaluation feedback option to a database (i.e. the database that stores the personal profiles). See col. 9, lines 16-21 and col. 11, line 65 – col. 12, line 10.

Referring to claims 6 and 22, Sass discloses

(D) initiating execution of a command associated with one of the plurality of the displayed evaluation feedback options (i.e. opening a web page or updating a profile; col. 9, lines 14-30).

Referring to claims 7 and 23, Sass discloses (A) comprises:

(A1) rendering the evaluation component with a separate user selectable sub region for the displayed command option and a separate user selectable sub region for the plurality of evaluation feedback options. For example, each of the icons described in col. 8, lines 22-33 are command options with a separate selectable sub region than icons 390 (smiley and frowny icons).

Referring to claim 8, Sass discloses that the plurality of evaluation feedback options are rendered as icons. See Fig. 3, 390 and col. 9, lines 15 and 22.

Referring to claim 9, Sass discloses that the evaluation component is rendered a part of an application user interface (media player; Fig. 3, 300).

Referring to claim 10, Sass discloses the evaluation component is rendered as part of a web page. See col. 8, line 54 – col. 9, line 40, which describe the integration of the evaluation icons and web pages.

Referring to claim 11, Sass discloses that the evaluation component is rendered as part of a browser application. See col. 6, line 50 – col. 7, line 4, which describes how the media player is an interface for Internet content.

Conclusion

3. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. § 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach methods of providing user feedback evaluation.
